

OUT OF THE ORDINARY

Combined urinal and lamp pillar, c 1900-1910

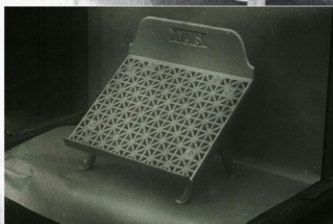

Railway ticket collector's kiosk, London, and North Eastern Railway, 1940s

Toilet block, Walsend Sluway & Engineering Co. 1906. Public urinals and toilets were often made from cast iron. The Lion Foundry supplied fittings to many companies with large workforces, including the Clyde and Tyne-side engineers. These facilities would be supplied with a timekeeper's desk to prevent the workers from loitering.

Plaster pattern for decorative feature on a building front panel for Waterloo Station, London, c 1918, modelled by Holmes and Jackson, Glasgow.

Postcard of a casting featuring the letters 'MOIS', c 1900-1920. The intended use for this casting is not clear although suggestions have included a stand or lectern.

Page from published trade catalogue detailing the Roman coins found at the Lion Foundry site by workmen in 1893.

Gates at the Kensington Gore entrance to Hyde Park, London. These gates were cast by the Lion Foundry to replace originals made by the Coalbrookdale Co Ltd for the Great Exhibition of 1851.

Wooden pattern of dog's head

Cast-iron stair cases and fire-escapes were a speciality of the Lion Foundry. This example was supplied to Rudge-Whitworth Limited, bicycle and motorcycle manufacturer of Coventry, c 1910. The photograph shows staff filling the street in front of the factory, lining the fire-escape on the side of building and even standing on the roof of the factory.
